SUBJECT : ROLL-OUT OF THE SCHOOL GOVERNANCE COUNCIL (SGC)
FUNCTIONALITY ASSESSMENT TOOL FOR PUBLIC
ELEMENTARY SCHOOLS

DATE : 19 September 2026

The Implementing Guidelines on the Establishment of the Schools Governance Council (SGC) or DepEd Order 26, s. 2022 mandates all public schools to establish their SGCs to strengthen the role of school stakeholders as partners in providing accessible and quality education, upholding children's rights and promoting respect and well-being in the learning environment to ensure effective education service delivery.

To strengthen implementation, the Bureau of Human Resource and Organizational Development – School Effectiveness Division (BHROD-SED) developed and rolled out a functionality assessment tool in 2022 and 2023 to evaluate School Governance Councils (SGCs) in secondary schools. Across 16 ROs and 217 SDOs, a total of 10,096 secondary schools were covered. Of these, 9,498 schools (94%) participated in the endline data collection. Among participating schools, 4,649 (49%) were found to have functional SGCs.

Building on this success and following a series of online consultations with field counterparts on the development of the tool, BHROD-SED shall roll-out the **SGC Functionality Assessment Tool for Public Elementary Schools**. The data to be gathered shall be used as information on the current context of the SGCs and the priority areas that need support and assistance from the different governance levels.

The SGC Functionality Assessment Tool shall be implemented exclusively in public elementary schools. In the absence of an online tool for public secondary schools to be

deployed by the Central Office, it is hereby recommended that the provision of technical assistance, as well as the conduct of validation and monitoring for public secondary schools, be sustained. These may be carried out through various modalities, depending on the preference and capacity of the Regional Office (RO) and Schools Division Office (SDO) SGC Composite Teams.

These measures at the secondary level are necessary to maintain the functionality of School Governance Councils (SGCs). Moreover, they ensure the availability of accurate, updated, and reliable data to support planning and decision-making across all governance levels.

In line with the rollout of SGC Functionality Assessment Tool for Public Elementary Schools, the following enclosed documents are issued for guidance and reference:

Enclosure No. 2 to **DM-OUHROD-2026-** **SGC FUNCTIONALITY ASSESSMENT TOOL (PRINTABLE FOR REFERENCE)**

Implementing Guidelines on the Establishment of School Governance Council (DO 26, s. 2022)
SGC FUNCTIONALITY ASSESSMENT TOOL
For Public Elementary Schools • 2024 Rollout

In relation to the mandate of DO 26, s. 2022 on the establishment of School Governance Council (SGC) and to ensure that all public schools are able to create functional SGCs, the Bureau of Human Resource and Organizational Development – School Effectiveness Division (BHROD-SED) shall conduct a monitoring and evaluation of SGCs through the SGC Functionality Assessment Tool ("SGC Tool").

UNDERSTANDING THE SGC FUNCTIONALITY ASSESSMENT TOOL
This SGC Functionality Assessment Tool aims to assess the functionality of SGCs in secondary schools. The Tool consists of the following components:

- Two (2) Main Purposes
 - To provide structure for shared governance
 - To provide a feedback mechanism
- Twelve (12) Functionality Indicators
Functionality indicators are anchored on the two main purposes of the SGC and can be found in Section VII of DO 26, s. 2022. In this SGC Tool, these indicators are grouped according to the functions per purpose. Additionally, a brief description on how the Functionality Indicator can be observed is also included to provide schools with further guidance in establishing functional SGCs.
- Nineteen (19) Functionality Sub-indicators
In this SGC Tool, there are seven (7) functionality indicators that have sub-indicators. Sub-indicators are the specific activities that enable the achievement of their corresponding functionality indicator. These are divided into:
 - Primary Sub-Indicators, which are the sub-indicators that determine the achievement of their corresponding Functionality Indicators, and thus must be met; and
 - Other Sub-Indicators, which are the sub-indicators that SGCs may comply with, only when the Primary Sub-Indicator is met and applicable.

The result of the assessment shall be used as information in identifying priority areas that may need support and assistance from the different governance levels.

Determining a Functional SGC Through the SGC Functionality Assessment Tool
For an SGC to be considered functional, the Council must be able to comply with at least 10 out of the 12 (at least 80%) Functionality Indicators based on the minimum MOVs submitted. Thus, at a minimum, functional SGC complies with the following requirements:

- Functionality Indicators without sub-indicators are observed (Yes to all Functionality Indicators without sub-indicators)
- Primary Sub-indicators, under Functionality Indicators with sub-indicators, are observed (Yes to all Primary Sub-Indicators)
- Minimum MOVs are submitted.

The Other Sub-Indicators are also recommended to be attained to further strengthen the SGC's functionality. Additional MOVs may be submitted when available to showcase its advanced practices. In addition, ensure that the MOVs are complete and readily available during data validation of the SDOs and/or BHROD-SED.

Enclosure No. 3 to **DM-OUHROD-2026-_____**
PROCESS FLOW OF THE DATA COLLECTION AND MONITORING OF THE SGC FUNCTIONALITY ASSESSMENT TOOL

To ensure smooth implementation of the SGC Functionality Assessment Tool, procedures on the Data Collection and Report Generation are stated below:

General Process Flow:

The General Process Flow below shall be broken down per Governance Level to better guide the Central Office (CO), Regional Offices (RO), Schools Division Offices (SDO), and schools of their roles and responsibilities regarding the accomplishment of the SGC Functionality Assessment Tool.

The process flow for the implementation of the SGC Functionality Assessment Tool outlines a structured and collaborative approach among the CO, RO, and SDOs to ensure accurate data collection, validation, certification, and analysis.

The process begins with **dissemination**. The CO disseminates the Google Forms version of the SGC Functionality Assessment Tool to schools through the RO and SDOs. This ensures that all concerned public elementary schools receive the official tool and proper guidance on its use. Clear communication at this stage is critical to establish uniform understanding and implementation procedures across regions and divisions.

Following dissemination is the **accomplishment** phase. Only Public Elementary School SGCs are required to accomplish the Google Forms version of the assessment tool. At this stage, schools provide the required data and supporting Means of Verification (MOVs), ensuring that submissions are complete and aligned with the prescribed indicators of functionality.

Once submissions are completed, the process moves to **validation and monitoring** at the SDO level. The SDO SGC Composite Team validates the data submitted by SGCs using the SDO Validation Sheet. In addition to validating elementary school submissions, the SDO SGC Composite Team also provides updated data on the functionality of secondary schools' SGCs in the SDO Spreadsheet, using their own strategies for data collection. This step ensures data accuracy, completeness, and

reliability prior to certification. Validation and monitoring serve as quality control mechanisms to uphold the integrity of the assessment results.

Parallel to validation, SDOs continuously **provide technical assistance**. This includes guiding schools in properly accomplishing the tool and correcting submissions with incomplete or inaccurate MOVs before the deadline. Technical assistance ensures that schools are supported throughout the process and are given opportunities to rectify deficiencies, thereby improving overall data quality.

After completing validation, the **SDO SGC Focal person submits the certification** of the accomplished SDO Validation Sheet to the RO via email. This SDO certification formally attests that the division has reviewed and validated all required submissions in accordance with established guidelines.

Subsequently, the RO SGC Focal person undertakes its certification process. Once all SDO certifications are completed within the deadline, the RO certifies the RO Monitoring Sheet as correct and accurate. This step confirms that the consolidated data from divisions within the region have undergone appropriate validation and meet reporting standards.

The final stage is **consolidation and analysis at the CO level**. The certification of the RO Monitoring sheet submitted by the ROs are consolidated and analyzed by the CO. This enables the CO to generate comprehensive insights, inform planning and policy decisions, and support reporting requirements at the national level.

Overall, the process flow demonstrates a systematic framework. Each level, the school, division, region, and central office, plays a defined and complementary role. Through dissemination, accomplishment, validation, technical assistance, certification, and consolidation, the system ensures that data on SGC functionality are accurate, credible, and useful for continuous improvement and informed decision-making.

Central Office

The diagram illustrates the **six key responsibilities of the CO** in the implementation of the SGC Functionality Assessment Tool. The process begins with the **creation** phase, wherein the CO develops the online version of the tool and its corresponding user guide and conducts consultations across governance levels to ensure

standardized implementation and clear guidance. This foundational step ensures that the assessment instrument is technically sound, accessible, and aligned with policy objectives.

Following development, the CO undertakes the **dissemination** of the official Google Forms links to the ROs through formal communication channels. This ensures that only authorized and accurate materials are circulated and that the roll-out is properly initiated nationwide.

As implementation progresses, the CO performs a **monitoring** function by regularly tracking the data submitted by the SGCs. This oversight enables the identification of submission gaps, emerging concerns, and areas requiring technical assistance. In support of this, the CO also conducts a **monthly progress check**, typically during the third week of each month, to review each region's status in implementing the tool and to ensure alignment with established timelines.

Subsequently, the CO facilitates the **consolidation** of certified RO monitoring sheets. This step ensures that all submitted data is validated, organized, and prepared for comprehensive review. Finally, the CO carries out the **analysis** of the consolidated data. Through systematic interpretation of results, it identifies trends, assesses the functionality of SGCs, and determines priority areas for policy guidance and targeted support. Collectively, these responsibilities demonstrate the CO's role in ensuring a structured, accountable, and evidence-based implementation process.

Regional Office

The process flow presents the role of the **RO** in the implementation of the SGC Functionality Assessment Tool, highlighting its oversight and coordination functions throughout the process.

The process begins with **reading and understanding** the SGC Functionality Assessment Tool User Guide. The RO is expected to familiarize itself with the guidelines to ensure clear direction and consistent implementation across all SDOs.

Next is **dissemination**. The RO distributes the official Google Forms links of the tool to the SDOs and organizes an RO Composite Team, chaired by the Assistant Regional Director, to oversee implementation within the region.

The **RO SGC Composite Team** may be composed of three (3) to five (5) members, including the SGC Focal person. It may also include representatives from relevant functional units, as deemed appropriate, to promote objectivity, strengthen monitoring efforts, and ensure efficient provision of technical assistance throughout the implementation process.

The RO then proceeds with **monitoring** using the RO Spreadsheet. The RO Composite Team tracks submission status ensures timelines are met and addresses any issues that may arise during implementation.

Part of the monitoring process includes the **management of multiple submissions**. The RO SGC Focal person is granted backend access to delete duplicate entries. However, deletion shall only proceed upon the RO's notification to the SDO of the list of schools recommended for deletion and the subsequent acknowledgment by the SDO. Thereafter, the Multiple Submission Deletion Log shall be updated to ensure the accuracy, reliability, and integrity of records.

Once all SDO certifications are completed, the RO SGC Focal person moves to **certification**, confirming that the RO Spreadsheet is correct and accurate.

Finally, the certified document is **submitted to the CO** through the prescribed Google Forms link, signifying the completion of the regional process.

Overall, the RO serves as the coordinating and quality-assurance body, ensuring that implementation is organized, monitored, accurate, and properly reported.

Throughout the entire process, the RO SGC Composite Team continuously **provides technical assistance** to SDOs. This includes guidance on proper implementation, clarification of procedures, support in addressing data concerns, and reinforcement of validation standards. By sustaining technical support, the RO strengthens the capacity of divisions and promotes consistent, results-based functionality of SGCs.

School Division Office

The process flow highlights the role of **the SDO** in implementing the SGC Functionality Assessment Tool. It outlines the sequence of actions from preparation to final submission and certification.

The process begins with **Read and Understand**. The SDO is encouraged to thoroughly review and familiarize itself with the SGC Functionality Assessment Tool User Guide before disseminating the links of the tool. This ensures clarity of procedures, proper guidance to schools, and consistent implementation within the division.

Next is **Dissemination**. The SDO disseminates the official Google Forms links of the SGC Functionality Assessment Tool to the public elementary schools. To effectively manage the process, the SDO forms a **SDO SGC Composite Team**, chaired by the Assistant Schools Division Superintendent. This team oversees monitoring, validation, and technical assistance within the division.

The SDO SGC Composite Team may be composed of three (3) to six (6) members, including the SDO SGC Focal person and the Public Schools Division Superintendent. It may also include representatives from relevant functional units, as deemed appropriate, to promote objectivity, strengthen monitoring efforts, and ensure efficient provision of technical assistance throughout the implementation process.

The third step is **Monitoring**. The SDO SGC Composite Team tracks school submissions using the SDO Spreadsheet. This allows the division to check progress, identify incomplete submissions, and ensure compliance with deadlines.

Following monitoring is **Validation**. The submitted data is validated by the SDO Composite Team through the SDO Validation Sheet. The team reviews the information and the MOVs. If necessary, field visits may be conducted to verify the accuracy and authenticity of submissions.

Parallel to validation is the provision of **Technical Assistance**. The SDO SGC Composite Team continuously guides schools in properly accomplishing the tool and in correcting submissions with incomplete or inaccurate MOVs before the deadline. However, it must be noted that the SDO SGC Focal Person shall have the discretion to determine whether schools will be permitted to update or correct their submitted MOVs, subject to applicable policies and timelines. Validated data submitted by SGCs in public elementary schools are then included in the official recorded data of the division.

The next step is **Update**. The SDO SGC Composite Team provides updated data on the functionality of SGCs in Secondary Schools in the SDO Monitoring Sheet. This ensures that both elementary and secondary school data are properly captured and reflected at the division level.

Finally, once all validated SGC data are confirmed as complete and accurate, the SDO SGC Focal person proceeds to **Submit**. The certification of the accomplished SDO Spreadsheet is submitted to the RO via email before the deadline.

Overall, the SDO SGC Composite Team plays a central coordinating and quality assurance role, guiding schools, validating submissions, providing technical support, updating monitoring records, and formally certifying the division's data for regional consolidation

Public Elementary Schools

The process flow outlines the process at the school level, specifically for SGCs in public elementary schools, in accomplishing the SGC Functionality Assessment Tool.

The process begins with **Read and Prepare**. SGCs are expected to carefully read and follow the instructions in the SGC Functionality Assessment Tool User Guide. They must prepare accurate and quality MOVs and consolidate the required documents per indicator. Schools are instructed to separate Minimum MOVs from Additional MOVs and compile them into one (1) PDF file per indicator. In addition, Google Drive folders must be created for each indicator to organize and store the supporting documents properly.

During this stage, the **School Head** plays a key role in facilitating the school's submission. The School Head ensures that the tool is properly accomplished and that members of the SGC are consulted in answering the assessment. This promotes collaboration, transparency, and collective ownership of the submission.

The next step is Upload. The School Head, together with the SGC, shall facilitate the uploading of the prepared MOVs to the designated Google Drive folders assigned for each indicator. After uploading, they shall generate or copy the link to the Google Drive folder, which contains subfolders for each MOV per functionality indicator, for use in the submission to the assessment tool.

Finally, the SGC proceeds to **Accomplish the SGC Functionality Assessment Tool** via Google Form. In accomplishing the form, the school must ensure the use of an active and official DepEd email address. The link to the corresponding Google Drive folder must be provided in the designated section of the form. Schools are reminded that the tool shall be accomplished only once; thus, careful review and completeness of all entries must be ensured prior to final submission.

Overall, the school-level process ensures that submissions are well-prepared, properly documented, collaboratively completed, and systematically organized before being formally submitted through the online assessment tool.
