MEANS OF VERIFICATION

The **Means of Verification (MOV)** serve as documentary evidence to support and validate the reported level of functionality of the SGC. These documents provide tangible proof that the required structures, processes, and practices of shared governance are in place and are being implemented effectively.

The submission of MOVs ensures the accuracy, credibility, and transparency of the data encoded in the SGC Functionality Assessment Tool. It also enables the SDO and RO SGC Composite Teams to validate submissions, monitor progress, identify gaps, and provide appropriate technical assistance to schools. Ultimately, MOVs support evidence-based decision-making and continuous improvement of SGC implementation.

Refer to the **printable version of the SGC Functionality Assessment Tool** for the checklist of MOVs per indicator and the **MOV templates** available in this link:

tinyurl.com/SGCMOVTemp 🔍

Please take note that the sample format of the MOVs may be modified and contextualized in accordance with the preferences of the SGCs. It is provided solely as a reference to ensure that all significant elements aligned with the Functionality indicators are duly captured and not overlooked, without affecting the validation process of the MOVs.
